

Solar heat on the global scale

544 GW_{th} total capacity
in operation end of 2024

-3% growth in total capacity
in operation 2023/2024

443 TWh of thermal
energy produced

153.5 million tons
of CO_2 avoided

126 million solar heat systems in
operation end of 2024

318,000 jobs in the global solar
thermal sector 2023
